

Logic Assignment — Do a load of laundry

How do I clean my clothes?

- What type of laundry am I doing?
 - What color clothes need to be washed (white, light, or dark)?
 - In our theoretical load of laundry, most of our laundry, since most of the laundry that needs to be done is light colored, then I will only wash the light colored laundry.
 - What do the care labels say?
 - Does it say to hand wash, dry clean, or machine wash?
 - Since all of our clothes say that they can be machine washed, we will be using the washing machine.
 - How do you machine wash clothes?
 - You first load the washer by transferring the clothes from the laundry basket into the washer.
 - Then, set the wash cycle accordingly (our load will use the normal cycle setting).
 - Then, set the water temperature according to the care label (all of the clothes in our load require cool temperature water).
 - Then, pour the detergent into the slot for detergent.
 - Then, press the start button, and wait for the washer to finish.
 - Remove the clothes from the washer and load them into the laundry basket.
 - Can you dry the clothes in the dryer or not?
 - Since not all of the clothes say they can be put in the dryer, we will be air drying them.
 - How do you air dry clothes?
 - Go to the drying rack.
 - Take the clothes from the laundry basket, and hang each article of clothing one at a time on a hanger.
 - Take the hanger, and hang it on the drying rack.
 - Place some fans under the clothes to expedite the drying process.
 - What do I need to clean my clothes?

- Laundry basket
- Laundry detergent
- Washing machine
- Hangers (shirt hangers and pant hangers)
- Drying rack
- Fans
